

## Features

- Screening practically without blinding
- Compact double deck design
- Inclination up to 30° downwards possible
- Dynamic power of bottom deck individually adjustable
- High throughput
- Down time for panel cleaning reduced to negligible minimum
- No rope formation of oversize particles
- Loose flow of oversize at discharge which makes further handling easier

## Technical data

Material:	MSW, C&I, scrap, slag from incineration
Infeed capacity:	depending on material
Cuts:	acc. to specification
Type:	SMV 1200x4000 F-UW24
Vibrating weight:	4300 kg
Total weight:	6200 kg
